Scottish Index of Multiple Deprivation

This information is taken from the Scottish Index of Multiple Deprivation (SIMD) using figures from 2016 and gives you some information about your parish. However, this is not an end in itself but a starting place for you to explore. In identifying which indicators of deprivation are particularly relevant, and in which parts of the parish, it can open questions about how the church can engage with those issues in the community.

More information is available at <http://simd.scot>

Priority Areas

The Priority Areas committee is part of the Ministries Council and is responsible for the support, development and co-ordination of the Church's work within its poorest communities. However, it is important to recognise that priority for the poorest and the most marginalised is the gospel imperative facing the whole Church, not just the Church in the poorest places.

Priority Areas are committed to working with anyone who is engaged in tackling the causes or effects of poverty in their communities and to sharing the learning from our work with the wider church.
